

Information Quality and Security Policy

[j-labs sp. z o.o.](#)

The main purpose of j-labs sp. z o.o. is to provide our Clients with top quality IT services and solutions. In carrying out our mission, we make sure that our business processes are compliant with the requirements of the ISO 9001: 2015 and the ISO/IEC 27001 international standards. This allows us to continuously ensure the security, confidentiality, and availability of the data and information entrusted to j-labs by our Clients, business partners, employees, and contractors.

Our goals are achieved taking into account the best industry practices and the needs and expectations of Clients, candidates, and suppliers. We respect legal regulations, considering the context of our organization's operations. On an ongoing basis, we identify and monitor the threats and opportunities related to achieving our goals. As a result, we actively prevent the materialization of risks that could affect the business goals of j-labs and our stakeholders. The best evidence that we provide services of appropriate quality that meet the relevant standards are the outcomes of projects and a high level of service, which are positively evaluated by our Clients and employees. The parameters related to quality and security are monitored on a regular basis and the implemented solutions are verified in view of their efficiency in removing threats or improving quality. We make sure that the results we produce are a basis for further improvement of our activities and for carrying out the initiatives taken by the company, while creating a stable and respectful workplace at j-labs sp. z o.o.

j-labs makes any and all efforts to guarantee that its business operations promote the principles of sustainable development that is socially responsible and sensitive to the natural environment and its constant protection.

The management board of j-labs sp. z o.o. and a team of highly qualified and experienced employees and contractors make any and all efforts to ensure that the information technologies used to provide services meet the requirements of the interested parties.

The company's management board intends to carry out the above policy through the following goals:
